PLANT AND SOIL

Contents Volume 307 Nos. 1–2 June 2008

Regular Articles

Meta-analysis of maize yield response to woody and herbaceous legumes in sub-Saharan Africa
G. Sileshi · F.K. Akinnifesi · O.C. Ajayi and F. Place 1–19

Reexamination of silicon effects on rice growth and production under field conditions using a low silicon mutant
K. Tamai and J.F. Ma 21–27

Carbon and nutrient stocks of tea plantations differing in age, genotype and plant population density
D.M. Kamau · J.H.J. Spiertz and O. Oenema 29–39

Belowground net primary productivity and biomass allocation of a grassland in Inner Mongolia is affected by grazing intensity
Y.Z. Gao · M. Giese · S. Lin · B. Sattelmacher · Y. Zhao and H. Brueck 41–50

Temporal variability of solution Cd^{2+} concentration in metal-contaminated soils as affected by soil temperature: consequences on lettuce (*Lactuca sativa* L.) exposure
J.Y. Cornu · L. Denaix · A. Schneider and S. Pellerin 51–65

Hydrogen emission from nodulated soybeans [*Glycine max* (L.) Merr.] and consequences for the productivity of a subsequent maize (*Zea mays* L.) crop
M.B. Peoples · P.D. McLennan and J. Brockwell 67–82

Species-specific characteristics of trees can determine the litter macroinvertebrate community and decomposition process below their canopies
S. Negrete-Yankelevich · C. Fragoso · A.C. Newton · G. Russell and O.W. Heal 83–97

Surface soil carbon size–density fractions altered by loblolly pine families and forest management intensity for a Spodosol in the southeastern US
D.V. Sarkhot · E.J. Jokela and N.B. Comerford 99–111

No short-term change in soil properties following four-fold litter addition in a Costa Rican rain forest
T.E. Wood and D. Lawrence 113–122

Positive correlation between soil bacterial metabolic and plant species diversity and bacterial and fungal diversity in a vegetation succession on Karst
X.-Y. He · K.-L. Wang · W. Zhang · Z.-H. Chen · Y.-G. Zhu and H.-S. Chen 123–134

Pre-inoculation with arbuscular mycorrhizal fungi increases early nutrient concentration and growth of field-grown leeks under high productivity conditions
J.N. Sorensen · J. Larsen and I. Jakobsen 135–147

Searching for an indicator of N evolution during organic matter decomposition based on amino acids behaviour: a study on litter layers of pine forests
P. Rovira · C. Kurz-Besson · P. Hernàndez · M.-M. Coûteaux and V.R. Vallejo 149–166

Aluminum distribution and reactive oxygen species accumulation in root tips of two *Melaleuca* trees differing in aluminum resistance
K. Tahara · T. Yamanoshita · M. Norisada · I. Hasegawa · H. Kashima · S. Sasaki and K. Kojima **167–178**

Root penetration through a high bulk density soil layer: differential response of a crop and weed species
G. Place · D. Bowman · M. Burton and T. Rufty **179–190**

Initial effects of experimental warming on carbon exchange rates, plant growth and microbial dynamics of a lichen-rich dwarf shrub tundra in Siberia
C. Biasi · H. Meyer · O. Rusalimova · R. Hämmerle · C. Kaiser · C. Baranyi · H. Daims · N. Lashchinsky · P. Barsukov and A. Richter **191–205**

Nitrogen losses from integrated rice–duck and rice–fish ecosystems in southern China
L. Cheng-fang · C. Cou-gui · W. Jin-ping · Z. Ming · Y. Wei-ling and S. Ahmad **207–217**

Factors controlling soil development in sand dunes: evidence from a coastal dune soil chronosequence
M.L.M. Jones · A. Sowerby · D.L. Williams and R.E. Jones **219–234**

A gradual rather than abrupt increase in soil strength gives better root penetration of strong layers
L.J. Clark · S. Ferraris · A.H. Price and W.R. Whalley **235–242**

Farmer-oriented assessment of soil quality using field, laboratory, and VNIR spectroscopy methods
O.J. Idowu · H.M. van Es · G.S. Abawi · D.W. Wolfe · J.I. Ball · B.K. Gugino · B.N. Moebius · R.R. Schindelbeck and A.V. Bilgili **243–253**

Commentary

New directions for improving the management of agricultural soils
R. Linker and P.M. Neumann **255–257**
